

INSPIRED BY THE HAZ MAT GUYS!

Smarter Than Sand, Faster Than Glass!

LET OBEXION FR EXTINGUISH YOUR LITHIUM BATTERY PROBLEMS

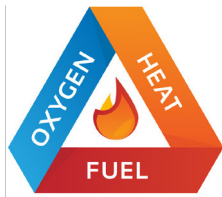

PROVEN TO LOWER TOXIC GASES BELOW IDLH LEVELS

Why Obexion FR?

Obexion FR is specifically designed as a mobile-ready solution for first responders who need to easily mitigate lithium battery risks. It was inspired by conversations with The Haz Mat Guys — former FDNY Hazmat 1 First Responders who have seen it all.

The Science behind Obexion FR

Obexion FR attacks *all three* pillars of the fire triangle (heat, oxygen and fuel) to quickly contain and extinguish lithium battery fires while maintaining safe IDLH toxic gas levels.

Step 1: Heat

First, Obexion FR extracts heat from its surroundings. This triggers an ongoing release of water, which cools the battery.

Step 2: Oxygen

It then creates a pressurized system, pushing oxygen away from the battery cathode and preventing oxygen from returning.

Step 3: Fuel

Lastly, Obexion FR serves as a barrier that prevents other parts of the battery from igniting, removing the fuel.

Inside of container can exceed 1700°C, but outside of container remains at ambient temperature at all times.

Loose Obexion FR compound

About DGeo

Backed by Labelmaster's 50+ years of hazmat industry expertise and a team of regulatory and packaging experts, DGeo prides itself on providing solutions to hazmat needs — not just products.

PERFORMANCE DATA 3RD-PARTY TESTED BY SOTERIA BATTERY INNOVATION GROUP

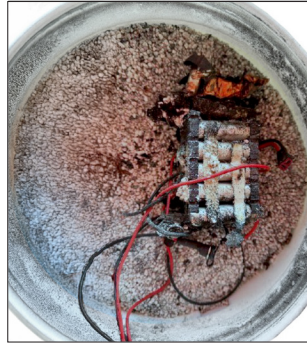

42L Single Battery Test

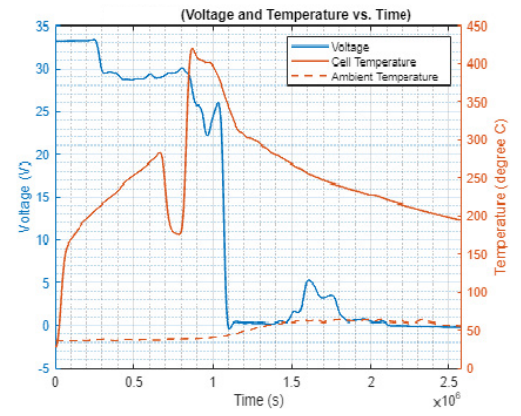

1 435 Wh battery 100% SOC

2 Loose Obexion FR poured over battery

3 Post-test results

30-GAL Multiple Battery Test

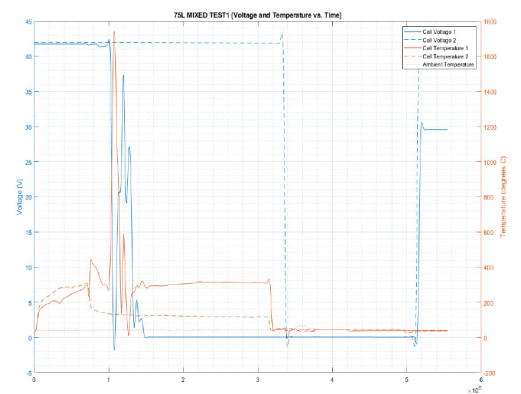

1 1440 Wh battery 100% SOC

2 Loose Obexion FR poured over batteries

3 Post-test results

SINGLE BATTERY PRODUCT OFFERINGS*

15 LB. BAG
Loose Obexion FR
Part #16001A

30 LB. BAG
Loose Obexion FR
Part #16000A

**KIT: 42L CurTec
UN Certified Pail**
Prefilled with 7 lbs. of loose
Obexion FR + 15 lb. bag of
loose Obexion FR Part
#15001

**KIT: 30-GAL Greif
UN-Certified Poly Drum**
Prefilled with 12 lbs. of loose
Obexion FR + two 30 lb. bags
of loose Obexion FR
Part #15000

*Special permit pending for multiple batteries
